

PLANNING A MOVE WITH PETS

Make a Plan:

VISIT THE VET

Collect any medical records for your pets. Make sure you get their prescription & any updates on shots.

PACK THE ESSENTIALS

Be sure to pack their treats, water, food, medications, grooming supplies etc. in an easily accessible bag.

FAMILIARIZE THEM WITH TRAVEL

If your pet is not familiar with traveling, show them their crate in advance. Use treats near their carrier to help with positive reinforcement.

Moving Day:

MAINTAIN A SENSE OF ROUTINE

Try to keep the routine as normal as possible. Keep your pet away from any action or movement, if possible.

BE REASSURING

Pets are very entuned with our emotions. To help make this transition easy, try to have patience with your pet during and after the move as they adjust.

DRIVING TIPS

If possible, make as many rest stops as possible for your pet. Keeping your pet secured in their crate will help with a less stressful transition.

Adjusting to their New Environment:

ADJUSTMENT TIME

Before unpacking any of your own things, allow your pet to rest and roam their new surrounding to familiarize themselves.

UPDATE PET INFORMATION

Change the address on your pets collar/microchip and contact your vet to update addresses or a new vet to set up an account.
